1. True or false? In React, you can use a ternary operator in a component's return statement in React.

1 / 1 point

- ☒ True
- ☐ False

Correct. In React, you can use a ternary operator in a component's return statement in React.

2. React Router is...

1 / 1 point

- ☒ A stand-alone package that you can add to a React app.
- ☐ A built-in part of React.
- ☐ A built-in part of React-DOM.

Correct. React Router is a stand-alone package that you can add to a React app.

3. React Router has a `<Link>` element.

1 / 1 point

- ☒ True
- ☐ False

That's correct! React Router has a `<Link>` element.

4. Please choose the valid command to install react-player.

1 / 1 point

- ☒ npm install react-player
- ☐ npm-install react-player
- ☐ npm-install-react-player

Correct. This is the command to use.

5. True or false? webpack is a module bundler.

1 / 1 point

- ☒ True
- ☐ False.

✓ **Correct**

Correct. Webpack is a module bundler.

6. What will be the output of the code below?

1 / 1 point

```
let name; if (Math.random() > 0.5) { name = "Mike"} else { name = "Susan"}
```

- ☐ It will always be Susan
- ☐ It will be 0.5
- ☐ It will always be Mike
- ☒ It will be sometimes Mike, and sometimes Susan, randomly

✓ **Correct**

Correct! The reason for this output is the if condition's code: `Math.random() > 0.5`, which introduces randomness.

7. Is the following component syntactically correct?

1 / 1 point

```
1  import car from "../assets/images/car.jpg";
2
3  function CarImage() {
4    return (
5      <img
6        height={200}
7        src={car}
8        alt="Car image"
9      />
10   );
11 };
12 export default CarImage;
```

- ☒ Yes
- ☐ No

✓ **Correct**

That's correct! This code is syntactically correct.

8. What is an asset?

1 / 1 point

- ☒ Images, stylesheets, fonts
- ☐ Components
- ☐ Images, video, and components

✓ **Correct**

Correct. Images, stylesheets, and fonts are all examples of assets in a React app.

9. What is the syntax used to add a new dev dependency to a React app? Select all that apply.

1 / 1 point

- ☐ node init some-package-name
- ☒ npm i --save-dev some-package-name

✓ **Correct**

Correct! Using this command, you'll add the some-package-name npm package as a dev dependency to your React app.

- ☐ npm init some-package-name
- ☒ npm install --save-dev some-package-name

✓ **Correct**

Correct! Using this command, you'll add the some-package-name npm package as a dev dependency to your React app.

10. If your app can compile without it, you can keep an asset in a public folder.

1 / 1 point

- ☒ True
- ☐ False

✓ **Correct**

Correct. Indeed, if your app can compile without it, you can keep an asset in a public folder.
