Grade received **100%** To pass 80% or higher

1. Every web page is made up of squares and rectangles. They are located within an encompassing grid layout.

1 / 1 point

☒ True

☐ False

✓ **Correct**

Correct! Every web page is made up of squares and rectangles. They are located within an encompassing grid layout.

2. Gutters are the negative space between the outside column's edge and the frame.

1 / 1 point

☐ True

☒ False

✓ **Correct**

Correct! Margins are the negative space between the outside column's edge and the frame. Gutters are the negative space between columns.

3. What grids are used to set the leading line of text to the following line of text?

1 / 1 point

☐ Block grids

☐ Column Grid

☒ Baseline grid

✓ **Correct**

Correct! Baseline grids set the leading from one line of text to the next for consistency. These are easier to organize, create vertical rhythm, and are aesthetically pleasing. As you probably used at school, a sheet of ruled paper is an example of a baseline grid.

4. \_\_\_\_\_ is a container where your design lives.

1 / 1 point

☐ Layer

☒ Frame

☐ Group

✓ **Correct**

Correct. The frame is a container where your design lives.

5. Responsive design is an approach to web page creation that uses flexible layouts, removing the need to design layouts to suit every device.

☒ True

☐ False

☒ **Correct**

Correct! Responsive design is an approach to web page creation that uses flexible layouts, removing the need to design layouts to suit every device.
