1. UX is an iterative process that solves usability problems.

1 / 1 point

- ☒ True
- ☐ False

✓ **Correct**

That's correct. UX or User Experience is an iterative process that solves usability problems and makes a product or service usable, enjoyable, and accessible.

2. What is a wireframe in UX design?

1 / 1 point

- ☐ It's a complete design of the product
- ☒ It's representation of the interface concerned with placement and hierarchy of content and functionalities.
- ☐ It's a 3D printed view of the project
- ☐ It's a simulation of the final functional product

✓ **Correct**

Correct. It's representation of the interface concerned with placement and hierarchy of content and functionalities.

3. Which of the following statements about designing forms are true?

1 / 1 point

- ☐ Forms are not an important part of user experience and can be designed quickly without considering the user's needs.
- ☒ It is important to design forms from the user's perspective to create a good user experience.

✓ **Correct**

That's correct. Forms are an important part of user experience, which is why time and effort should be spent on designing good forms from the user's perspective.

- ☐ Forms are only used to collect information for the stakeholder's benefit, so it is not worth putting effort into designing them.
- ☒ Time should be spent on good form design to create an appealing and approachable form that represents the brand.

✓ **Correct**

That's correct. Time and care should be taken to design forms well, as how are you meant to persuade your visitors to take the time to give you their personal information without a straightforward, approachable and appealing form? Forms also represent the brand, so a poorly designed form can frustrate potential customers.

4. Which of the following is true about responsive design? Select all that apply.

1 / 1 point

- ☐ Responsive design involves creating separate versions of a website or app for different devices.
- ☐ Responsive design only applies to desktop devices and is not necessary for mobile devices.
- ☒ Responsive design is a design approach that ensures a website or app looks good on all devices, regardless of screen size or resolution.

✓ **Correct**

That's correct. Responsive design ensures good visual appearance on all devices.

- ☒ Responsive design is a technique that automatically scales and rearranges the layout of a website or app to fit the screen size and resolution of the device it is being viewed on.

✓ **Correct**

That's correct. Responsive design automatically adjusts layout for different screens.

5. How many columns are generally used in a desktop grid system?

1 / 1 point

- ☒ 12
- ☐ 4
- ☐ 8

✓ **Correct**

That's correct. 12 column grids are commonly used in desktop designs. This allows for a high level of flexibility in terms of layout and design, as designers can use different combinations of columns to create a wide range of layouts.
